

Dear Upper School Parents,

Technology plays a significant role in education at TCS. Each of our students is provided with a MacIntosh laptop to use here at school. Students utilize technology in all subjects throughout the school day, including taking assessments, word processing documents, creating presentations, researching information.

We encourage you to consider purchasing a laptop for your child to use both at home and at school. This will provide additional practice opportunities for your child, and facilitate the transfer of information between home and school. For example, students can complete homework assignments at home and print them at school and easily work on classwork documents both at home and at school.

Students who do own their own laptop will receive technology support at school. We will assist them in learning the maintenance procedures and guide them in taking care of their equipment. If you are interested in purchasing a laptop, and would like some guidance, please contact Mrs. Drumm (ldrumm@udel.edu).
